## EU-MILL Final Conference to take place in Morocco

The Final Conference of EU-MILL project will take place in Morocco on March 2016. On this meeting the final results of all Work Packages will be presented in front of a wide audience. We expect to count with representatives from all partners' universities, civil society organization, National Tempus Points, representatives from the socio-economic field as well as political decision-makers from all partners' countries.

It is for us a great satisfaction to arrive to this point having practically achieved all the project objectives, we are proud of what it will presented and we are confident about the further impact on our Southern partner educational systems.

## University-Enterprise meetings concluded in all partner countries

The permanent feedback of universities with the socio-economic field is one of the cornerstones of Lifelong Learning so as to offer specific trainings meeting real enterprises' needs. EU-MILL is not unaware of this, consequently this permanent exchange of our partner universities with their countries enterprises has been one of the most important objectives of the project.

Within this context, five meetings have been organized by EU-MILL on the participant countries of the project hosted by our South Mediterranean partner universities:

The first conference took place in Tunisia by the end of 2014, concretely on October the 9th in Gabes and on December the 3rd in Sousse.

After these ones, there was a meeting with the Moroccan professional sector in Tangier hosted by Abdelmalek Essaâdi University coordinated with Mohammed V University on May the 8th 2015 and another in Algeria on the city of Constantine in June the 10th 2015 hosted by University of Constantine.

Finally, the last event took place in Beirut on September the 7th 2015 held by Lebanese American University with the close cooperation of Notre Dame University.

Lebanon's University-enterprise meeting at LAU (2015)

These meetings succeed to gather relevant stakeholders, representatives of enterprises, chambers of commerce as well as political decision-makers. These conventions have been a great display for disseminating our objectives and achievement, beside to the rising our awareness level on the Socio-economic field needs.

## Development of Pilot Courses

Throughout 2015 several training session have taken place on all partners' universities. These trainings consisted in two workshops on methodology and credit and competences systems and two online training seminars on quality assurance systems and e-learning. Every one of these modules has been followed by an average of 30 professors per university.

Among the participants of this workshops, every university have chosen small group to elaborate pilot courses on five subjects under the supervision of Lebanon's Notre Dame University in order to elaborate five pilot courses to be taught online to professors and students of their own universities. These courses were thematically related to the following topics: Entrepreneurship, foreign Languages, social Sector, use of new technologies applied on training.

These pilot courses has been designed during the last months of 2015 and taught from December to the first months on 2016 through EU-MILL platform or through the partner universities' own platforms. The achievement of the Pilot Course after the long training period is indeed a great value for EU-MILL project.
